

Child 4 – 6

1. Which category of motor skills improves at age 4?
2. What are the four methods of learning?
3. Name three ways to encourage reading.
4. What are two things a four year old can do using their fine motor skills at school or at play?
5. Why do you think age six is such a difficult age emotionally?
6. How is the way four – year – olds play together different from the way two – year – olds do?
7. Under what circumstances might a preschooler lie?
8. Based on what you know about brain development, how does a child's brain change and develop from age 1-6?
9. How do you think a caregiver should respond to a child's stress?

○ Scenario

- Five year old Callie attends a child care center where you are a worker. Over the past three weeks she has begun to bite her nails. She also has started twisting her hair, and she cries very easily. You suspect that she is upset about something. What are some ways you could try to find out what is troubling Callie? If there is a family problem, how would you handle the situations?
