

## BBT – week 10

This is the last week of home learning at SSHS, so this is your last suggested work assignment for BBT. You should submit any work you have done this week, or previously, by the end of the week.

So,

Try to make an enhanced power point of either your activities during the last 3 months or of what your summer plans are.

In BBT-week 6 (it's still available) you learned how to create a slide show with a soundtrack. Use that skill to make your slide show for this project. Here are some websites that offer "free to use" music and images. There will be no copyright infringement by using them in your school assignment.

Free images:

On your power point have some slides that only have images and text. Then have a couple of slides that have images, text and music. Finally have a slide that has your slide show imbedded. Don't forget to make an awesome title page.

In case you forgot, this is how you add images:

Insert a new slide and then open the “Insert” tab

Press the “Pictures” drop down menu to select the images for your slide

To imbed music and videos press the “Video” and “Audio” drop down menus on the “Insert” tab.
