

Science 9 – Home Learning Week 10

For our last week of Home Learning, we are going to focus on how Canada has contributed/is contributing to space exploration! This is a 3-part assignment.

Part 1 – Research

For this part, I want you to research ways that Canada has contributed to space exploration in the past.

Part 2 – CSA (Canadian Space Agency)

Check out the CSA website and take note of the many ways that they contribute to not only space exploration, but also to sharing their knowledge with the rest of Canada.

<https://www.asc-csa.gc.ca/eng/default.asp>

There are many videos you can watch, articles to read, games to play and podcasts to listen to. So, take some time to check out their links, and take note of the information you gain in how CSA is involved in space exploration and research projects.

Part 3 – Your Opinion

Write a short statement (1-3 paragraphs) stating your opinion on whether space exploration is important to society. Is it a waste of time, money, and resources? Or is it beneficial for our future? Now is your time to openly state what you think but make sure to back up your statements with some actual facts!

Make sure to cite all of your sources! If you use information and you do not say where you got it from, that is plagiarism. So cite your sources! 😊

Email me if you have any questions! I look forward to reading your finished assignments.
