

## Goals, Growth & Grit: Skills for Success 120

shelley.sterling@nbed.nb.ca

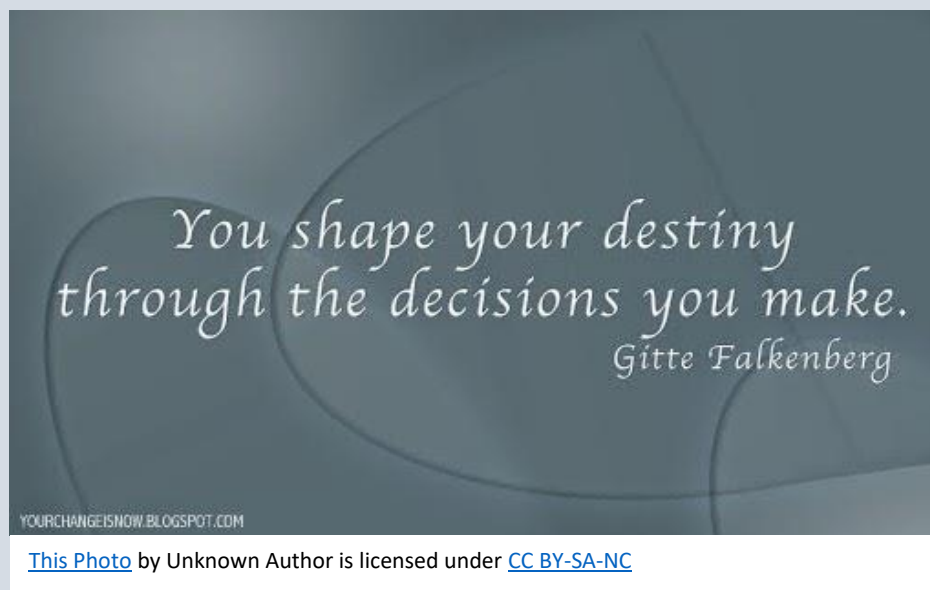

Hello class, I hope you are all enjoying the sunshine and warmer weather. Summer is in sight!

We have been looking at the most common soft/transferable skills required to be successful in the workplace and in life, the **4 C's**. We explored Communication, **Collaboration** and teamwork last week, and now we will look at the last 2 of the 4 C's together, as they are very much related. **Critical and Creative Thinking** are very different ways that we approach decisions, challenges, and problems. Critical thinking would be analyzing what makes a cookie tasty, and then judging a cookie in relation to that criteria. Creative thinking is imagining your own idea of the perfect cookie and then making it a reality. If you need to go grab a cookie before you continue reading, go ahead, I understand. 😊

Critical thinking is finding solutions to complex problems, while creative thinking is thinking outside the box in ways others may not. Both are necessary and sought-after skills in any career across every industry.

- Look at the CCT PowerPoint

When you have finished the PowerPoint and researched ways to improve your thinking in both domains, try this Wordsearch I created just for you. I made it a little extra challenging; I have hidden 20 words/phrases that we have used since the beginning of our home learning and you have to find them. Good luck! Let me know if you need any clues (ie first letters).

Have a great week, you've got this! 😊
